ANISH A

Java Developer | Backend Engineer

Bengaluru, Karnataka | +91 8848364163 | anish.pgt@gmail.com |

https://www.linkedin.com/in/anish-anantharaman | https://github.com/anish-anantharaman

PROFESSIONAL SUMMARY

Results-driven Java Developer with 3 years of experience designing and developing scalable backend systems and RESTful APIs for enterprise applications. Proficient in Java, Spring Boot, microservices architecture, and performance optimization — including Redis-based caching that reduced API response times by ~85%. Experienced with cloud integrations (AWS), messaging systems (Apache Kafka), and full SDLC in Agile environments. Seeking to leverage strong backend engineering skills in a challenging Java Developer role.

TECHNICAL SKILLS

Languages: Java 17/21/25 (Primary), Python, C/C++
Frameworks & Backend: Spring Boot 3/4, Spring Security, Spring Data JPA / Hibernate, Play Framework, FastAPI, Apache POI
Databases & Search: MySQL, MongoDB, Redis, Elasticsearch
Messaging: Apache Kafka
Frontend: Angular, React
Cloud & Integrations: AWS S3, AWS SES, Microsoft Graph API, Keycloak, KrakenD API Gateway
DevOps & CI/CD: Git, Jenkins, Docker, Maven, SonarQube
Testing: JUnit, Mockito, JMeter
API Standards: REST API Development, OpenAPI/Swagger, Microservices Architecture
Methodologies: Agile/Scrum, SDLC
AI-Assisted Dev Tools: Claude Code, GitHub Copilot

PROFESSIONAL EXPERIENCE

Software Engineer | **Tarento Group** — Bengaluru *Oct 2023 – Present*

- Architected and developed scalable backend services for enterprise web applications using Java, Spring Boot, and Play Framework, supporting business-critical workflows including time tracking, expense management, and project billing.
- Designed and built RESTful APIs following OpenAPI/Swagger standards to support operational workflows such as tracking, reporting, and process automation.
- Engineered Redis-based caching layer that reduced API response times from 5–8 seconds to under 1 second (~85% improvement), significantly reducing database load.
- Optimized backend performance through query optimization, caching strategies, and application-level tuning, improving overall system responsiveness.
- Built and enhanced the Client Portal module to streamline project billing and approval workflows, improving transparency for clients.
- Developed the Operations Tracker application to manage internal workflows and enhance process visibility across teams.
- Integrated AWS SES and Microsoft Teams (Graph API) to enable real-time email and messaging notifications, improving cross-system communication workflows.
- Implemented PostHog and Matomo analytics integrations to capture user behavior and support data-driven product decisions.
- Investigated and resolved production incidents through Root Cause Analysis (RCA) and timely hotfix deployments, maintaining ~99.99% SLA compliance.
- Delivered continuous monitoring and observability to ensure 99.9% application uptime.

Software Engineering Intern | **LTIMindtree** — Remote *Mar 2023 – May 2023*

- Completed structured training in Java, Spring Boot, Git, and Python, gaining hands-on experience in backend development and version control workflows.

KEY PROJECTS

Kronos – Enterprise Intranet Platform | *Java, Spring Boot, Play Framework, Redis, AWS, Kafka* | *Oct 2023 – Present*

- Led backend development of Kronos, a Tarento product — an intranet platform covering time tracking, expenses, feeds, training, and project billing.
- Implemented caching mechanisms that reduced response times and backend load across multiple application modules.
- Integrated email (AWS SES) and Microsoft Teams (Graph API) APIs for automated real-time notifications, improving reporting compliance and user engagement.
- Enabled continuous monitoring and observability, maintaining 99.9% SLA across the platform.

ScoreHub - FIFA World Cup Prediction Platform | *Python, FastAPI, PostgreSQL, React* | *Jun 2026 – July 2026*

- Built a full-stack FIFA World Cup 2026 prediction platform for the Swedish Chamber of Commerce India (SCCI) and its member companies.
- Developed using Python (FastAPI), React, and PostgreSQL.
- Implemented features including match predictions, leaderboards, secure authentication, and admin management.
- Delivered the application from concept to deployment in just one week.
- Leveraged Claude Code as part of an AI-native development initiative to accelerate end-to-end development.
- Recognized with the Team Impact Award for delivering a high-quality platform under an aggressive timeline.

Multi-Agent B2B Sales Lead Intelligence Platform | *FastAPI, MongoDB, Elasticsearch, Gemini LLM, n8n* | *Dec 2025 – Jan 2026*

- Built a multi-agent AI system for automated B2B lead generation, research, and personalized outreach as part of Tarento Tron Hackathon 2026.
- Designed agent workflows for research, classification, persona generation, and customized messaging modules.
- Implemented FastAPI-based microservices with n8n orchestration for trigger-based processing; integrated MongoDB and Elasticsearch for intelligent insights.

EDUCATION

B.Tech in Electronics and Communication Engineering *Jun 2019 – Jun 2023*

NSS College of Engineering, Palakkad, Kerala

AWARDS & RECOGNITION

- Team Impact Award – Honored with the Team Impact Award for executing the rapid development of the FIFA World Cup 2026 Prediction Platform for SCCI member firms within an aggressive seven-day timeline, ensuring high stability and user engagement.
- Spot Award – Recognized for exceptional performance and ownership in application development; Tarento Group, Sep 2025.
- Newbie Award – Recognized for consistent, high-quality delivery as a fresher; Tarento Group, Oct 2024.
